

QHSE Engineer

Would you like to use your qualifications and experience within a fast-growing, successful and market-leading electronic technology company with a specialization in sustainable and energy-saving products?

Your future employer

Eltwin Group develops, manufactures and sells power electronics for the global OEM-market. We are specialists in AC/DC inverters, soft starters and sensor technologies.

We make a great effort in developing and producing the best products in our industry. We support the transition to a more sustainable society by producing energy efficient products and parts that help our customers decrease their climate impact by lowering energy use and increasing the use of renewable fuels. We are committed to constantly improving the environmental performance of our products by innovative design and investments in new technology.

With more than 250 employees, we continue our growth path, which already makes us a firstmover developing sustainable and energy-saving products for climate protection. The corporate headquarters is located in Risskov, Aarhus, where you also will have your work place.

At the Risskov site, you find our R&D with 20 engineers as well as our Danish production facilities. In Poland we have our volume production facilities. We also have a site in Australia and recently we established warehouse facilities and a sales organization in Chicago, USA. Eltwin Group is a part of NIBE Industrier AB with 15.000 employees globally. NIBE Industrier AB is listed on the Nasdaq Nordic Large Cap in Sweden.

Your responsibilities

In the QHSE organization, you are the go-to-person in Denmark ensuring collaboration with the organization while delivering on the below:

- Supervising the functionality of the Quality Management System and HSE in the company and implementing of new systems
- Improvement and supervision of QHSE documentation, updating procedures and instructions
- Responsibility for certification and periodic, internal and external audits
- Supervising and implementing corrective and preventive actions (CAPA)
- Monitoring the current QHSE situation
- Conducting internal training in the area of QHSE
- Managing and reporting of QHSE indicators to the management

Your qualifications

- Minimum 2 years of experience in a similar position
- Experience in developing procedures and preparing documentation in accordance with the requirements of ISO 9001/ISO14001 and HSE - OHSAS18001/ISO45001
- Experience in implementing of Management Quality Systems and HSE
- The rights of the internal auditor ISO 9001 and ISO 14001 are welcome
- Knowledge of MS Office
- Fluent in English
- Systematic and structured, independent and self-starter
- Open-minded and able to work in a cross-cultural work environment
- Good communication skills, commitment and flexibility

Your manager is the Group Quality Director based in Poland. You must expect some travelling in relation to your work.

Join the Eltwin Group
